

The Problem Section

Welcome to the Problem Section. We will strive to provide several interesting and usually challenging problems for you to consider in each issue. Content will be mathematics and puzzles connected in some way to the mathematics we teach in the two-year college. Readers are invited (encouraged!) to submit problem proposals (with solution) for possible inclusion in this column. We also encourage readers to submit solutions to the problems posed here; we will publish the best or most interesting in a future issue.

Send all correspondence to Joe Browne at brownej@sunyocc.edu or at Mathematics Department, Onondaga Community College, Syracuse NY 13215.

The Problem Section is assembled by Fary Sami at Harford Community College, MD, and Tracey Clancy, Kathy Cantone, Garth Tyszka, and Joe Browne (editor) at Onondaga Community College, NY.
