

In the Spotlight: Featuring José María Menéndez

By Megan Breit-Goodwin, Anoka-Ramsey Community College

In the Spotlight is a regular feature of the MathAMATYC Educator begun in February 2017, which consists of a short article on research that is being done in mathematics education on the first two years of college mathematics. In particular, we feature research being done by members of the Research in Mathematics Education for Two-Year Colleges (RMETYC) committee. In addition, short articles on other persons of note within the context of AMATYC may also be included in subsequent issues.

Megan Breit-Goodwin teaches mathematics at Anoka-Ramsey Community College in Minnesota. She is a member of the RMETYC Committee of AMATYC. Her research focuses on student proportional reasoning in the first two years college mathematics.
