

A Probabilistic Look at “The Price Is Right” Showdown

Travis Thompson, Harding University

Abstract

This article develops a strategy designed to yield a probability greater than $\frac{1}{2}$ for winning the Showcase Spinoff on the popular daytime game show *The Price Is Right*.

Travis Thompson is professor of mathematics at Harding University. He attended his first AMATYC meeting in Houston in 1978 and served on the editorial board of *The AMATYC Review* for several years under the editorship of Don Cohen.
