

Bicycle Wheels, TNB Coordinates, and the International Space Station

Donald Teets, South Dakota School of Mines and Technology

Abstract

Donald Teets has taught mathematics at the South Dakota School of Mines and Technology since obtaining his doctorate from Idaho State University in 1988. He received the Allendoerfer award from the Mathematical Association of America in 2000 for an article on the astronomical work of Gauss, and the Distinguished Teaching Award from the Rocky Mountain Section of the MAA in 2004.

Donald Teets has taught mathematics at the South Dakota School of Mines and Technology since obtaining his doctorate from Idaho State University in 1988. He received the Carl B. Allendoerfer Award from the Mathematical Association of America in 2000 for an article on the astronomical work of Gauss, and the Distinguished Teaching Award from the Rocky Mountain Section of the MAA in 2004.
