

## ***Leibniz and the Nature of Innovation***

**Paul Bedard**, Saint Clair County Community College

### ***Abstract***

The mathematical accomplishments of Gottfried Leibniz were not simply genius, but were characterized by eagerness and haste, intuition and error, imagination and intensity. A look at the real history may help today's student to become an innovator rather than a rote learner.

*Paul Bedard has been teaching mathematics at Saint Clair County Community College for 14 years. Before that, he taught at Macomb Community College and Wayne County Community College. A lifelong Michigan resident and graduate of Wayne State University and the University of Detroit, he currently resides in Port Huron. Paul has also done some editing of mathematics textbooks and enjoys science fiction, history, philosophy, and board games.*
